Third-Party Licenses — LocalPrompt.ai Workstation

This document contains the **extensive list of all software licenses** applicable to the software and AI models preinstalled on this workstation. All licenses are included in full to comply with legal requirements and to inform the end user of their rights and obligations.

Contents

1. Overview

- All licenses in this document are included in full to comply with applicable legal requirements.

- All GPL/LGPL-covered binaries are unmodified Debian packages; corresponding source code is available from Debian mirrors or from us on request.

- Proprietary components (NVIDIA CUDA/cuDNN) are redistributed under their original EULAs.

- AI model weights are included under their respective licenses, which may impose additional use restrictions.
